

Renewable Energy

- ✓ **Hydro Power**
 - ✓ **Studies, design, planning**
 - ✓ **Technical/economic analysis**
 - ✓ **New and rehabilitation of old plants**
- ✓ **Solar Power**
- ✓ **Wind Poser**
- ✓ **Bio Mass**

Norway has produced electricity from its waterfalls for more than 100 years and developed a strong and competitive industrial base of efficient power producers and engineering, fabrication and service providers.

Close to 100% of Norway's production of electric power comes from hydro.

In the wake of this tremendous development, renewable energy technologies have become a major field of expertise in the Norwegian industry, backed by strong political support and focus on clean and sustainable sources of energy.

Being one of the only Norwegian power contractors, **Jacobsen Elektro** has built a well proven record of successful turn-key projects in the power sector worldwide.

Jacobsen Elektro AS has 70 employees. Main Office is close to Drammen outside Oslo. Our business encompasses turn-key delivery of substations, electrical transmission lines and power plants based on diesel, gas or heavy fuel oil. Jacobsen Elektro is a major contributor to reliable electrical power systems, through consulting, protection and control system deliveries and maintenance. We support the whole energy chain, from production, to transmission, via distribution to large scale industrial consumers.

Our customers are from various types of industry with high demand for electric power as well as power production and distribution companies.

Read more about Jacobsen Elektro at www.jel.no

Based on the client's requirements, **Jacobsen Elektro** puts together packages based on the most suitable equipment/ machinery that fully meet the customer's requirements. Designing the best tailor made and cost effective solutions that will fulfil your requirements for power generation.

We have the competence that it takes to build small solar, wind and hydro power plants:

Renewable Energy Generation

- ✓ Cutting-edge technology from one of the world's most advanced countries in the field
- ✓ Centuries of expertise in renewable energy projects
- ✓ Financing solutions with longer repayment periods
- ✓ Strong political support for renewable energy projects
- ✓ Focus on clean, viable and environment-friendly solutions

"Jacobsen Elektro's mission is to be the preferred electrification partner to supply quality solutions"
